"High Performance Wideband Amplifiers for Radar and Satcom Applications," No. 1, p. 142.

**Magnusson Inc.**

"A Magnetic MEMS-based RF Relay," No. 1, p. 124.

**MegaPhase LLC**

"65 GHz VNA Test Port Extension Cables," No. 3, p. 144.

**Milmega Ltd.**

"An Interface Providing Web-based Control of Microwave Power Amplifiers," No. 4, p. 136.

## PULSE GENERATORS

Picosecond designs and manufactures the world's leading **Step, Pulse, and Impulse Generators**. Each pulse generator is designed to deliver the best time domain performance possible.

- Step, Impulse, or Monocycle Outputs
- Amplitudes up to 50 V
- Risetimes as low as 5 ps
- Programmable models with adjustable parameters
- Ideal for UWB system testing, Semiconductor testing, and Risetime characterization

2 V/div and 100 ps/div  
Model 10,060A with Adjustable Duration

### Explore Our Product Line

PSPL has an extensive product line specialized in the generation, measurement, shaping, and transmission of broadband signals. Our product line includes instruments, modules, and components.

Amplifiers	Comb generators
Bias tees	TDR/T instruments
Low-pass filters	Sampler modules
DC blocks	Power dividers

## Picosecond

Pulse Labs

2500 55th Street, Boulder, CO 80301  
Tel: (303) 209-8100 • Fax: (303) 447-2236

The leader in the development of high-speed pulse generators for over 20 years.

## High-Performance Double Duty

### Companion Products

Fast Low-Phase-Noise Indirect Synthesizers

Frequency-Locked Oscillators (FLOs)

Digitally Tuned Oscillators (DTOs)

Voltage-Controlled Oscillators (VCOs)

### Applications

RWR

ESM

Simulators

### Dual-Mode Fast Indirect Synthesizer

As a synthesizer or oscillator, the Model 56218 Fast Indirect Synthesizer performs fast and reliably over a 2 to 18 GHz range in airborne applications. As a synthesizer, the 56218 combine high precision with a 25- $\mu$ s settling time. As a digitally tuned oscillator, it offers high-speed 1- $\mu$ s operation.

- 2-slot VME form factor
- 1-MHz step size
- Accuracy: per crystal reference
